

New Servo Parabolic Switch Aerial Vehicle Throw Device

Product description:

Tool-free installation in 5 minutes:

"The pre-drilled universal mount fits DJI Mavic/Autel/FPV drones in seconds, no welding or tools required. Includes 4 stainless steel screws and servo arm for instant installation."

Aircraft-grade aluminum construction:

"The CNC-milled 6061-T6 alloy frame supports payloads of 2 kg. Corrosion-resistant for marine/rescue operations: 10 times longer lifespan than plastic competitors."

Dual-stage precision release:

"The fail-safe servo mechanism offers 2 controlled drops (88mm hooks): perfect for aerial delivery, FPV racing sticks, or crop spray pods."

Ultra-compact and lightweight:

"Adds only 68g to your drone (3.46" length). Wind tunnel tested for zero interference with flight stability: ideal for cinematic/FPV drones."

Ready for multiple missions:

"The waterproof design works for search and rescue, agriculture (seeds/oil spreaders) or hobby challenges. Compatible with 9-12V ESCs and 25-35mm servo arms."

Description:

【Application】 : This drop device is designed to control drone models, especially multi-rotor drones, improving the functionality and versatility of your drone.

【Material】 : Made of metal, this product ensures long-term performance and wear resistance.

【Product Dimensions】 : With a length of 88 mm, this compact device can be easily installed on your drone without adding significant weight or bulk.

【Package Contents】 : Each package includes one drop device, one accessory part, and 4 screws for easy installation on your drone.

【Versatile Use】 : Whether you're using it for delivery or other creative applications, this two-stage hook release mechanism adds a new level of capability to your drone.

Size Chart:

Length: 8.8 cm / 3.46 inches.

Package Includes:

1 RC Air Drop System Device, 1 Servo Arm, 4
Screws.
