

VRX 3.3G receiver

Description:

Features:

1. 3.3GHz professional frequency band, specially designed for FPV racing drones, stable and reliable signals
2. Receiving sensitivity -95dBm, still transmits audio and video clearly under weak signal environment
3. Adjustable transmitting power (25mW-6W) to meet the needs of different scenarios, flexible and adaptable
4. Transmit distance up to 30km, support ultra-long distance wireless audio and video transmission
5. 16CH multi-channel switching function, effectively reduce

interference and ensure high quality
signal transmission

Parameter:

Input voltage: DC 7-36V

Receiving sensitivity: -95dB

Operating frequency: 3.3GHz

Channel: 16CH

Size: 50*32*11mm

Brand Name: vifly

Is Electric: No battery

Origin: Mainland China

Material: Composite Material

Recommend Age: 14+y

Use: Vehicles & Remote Control Toys
