

Stepper Motor Counter

Features:

High accuracy and defective percentage: <0.3%

Thicker double shielded metal case : 1.1 mm

We can provide two kinds of reverse-and anti-reverse function of product

Work voltage:	3V-6V
DC impedance:	450Ω±50Ω At 20℃
Applicable pulse width:	80ms-300ms
Applicable frequency:	≤4HZ
Deferent moment:	57μ Nm/4.5V
Work temperature:	-40℃-+70℃
Counter range:	0.0 to 99999.9
Figure color:	5 black + 1 Red
Drive ratio:	100:1 / 200:1 / 400:1 / 800:1
Use life:	pulse exceed a hundred million times (more ten years)
Antimagnetic capability:	Accord GB/T17215 standard request
Other technical condition:	Accord JB5459-91 standard request
Applicable ammeter constant:	800/1600/3200imp/kwh.
