

YIHUA 908+ Soldering Iron

Main function:

1. Portable anti-static heated iron, temperature control using the latest advanced temperature control circuit, precise temperature control.
2. Heating core made of high quality and durable materials, long service life.
3. Handle with a new high-temperature materials and environmental protection, while steel tube handle and heat increases the temperature in isolation ring, effectively blocking heat transfer and improve the use of comfort.

Technical data:

Power consumption : $\leq 65W$

Soldering Iron Temperature range : 200-480°C

Operating temperature: 0-40°C

Soldering Iron heater material: Imported heater
